

LES BIENFAITS DE L'ÉDUCATION ARTISTIQUE

CREATIVITY

The arts encourage an innovative and creative mindset. They promote reflection and sharing of positive experiences. This creativity and the sense of wonder also strengthen their capacity in other academic disciplines.

SELF- DISCOVERY

Art allows one to express his joys and sorrows non-verbally. Self-expression and self-invention via visual experience increases self-confidence and allows self-discovery from other angles.

SOCIALISATION

The child learns how to respect others through play. He develops an affinity to help each other and empathize and also expresses his personality while accepting differences.

MULTIPLE INTELLIGENCES

Artistic expression exists in various forms which can be manual or cerebral/intellectual, promoting problem solving. This is an important step in intellectual development.
